EXPERIENCE

Co-Founder · Pixel Dreams Studio
Jan 2025 — Present

Co-founded an independent game studio focused on premium games, XR applications, and interactive experiences using Unity and Unreal Engine. Senior Developer on **Chess Run** (live on Google Play); founder of **Worldscar** in Unreal Engine 5 — from GDD planning to a functioning demo, all crafted solo.

Co-Founder & CTO · Designfull
Feb 2023 — Jan 2026

Led the technical development of web, mobile, and digital products while overseeing architecture, development workflows, and product execution across the client roster.

Game Developer · CobWeb Games
Aug 2023 — Sep 2024

Unity Developer contributing to over ten mobile games and successfully launching six titles on the Google Play Store, with a focus on gameplay systems, optimization, and publishing.

Freelance Game & Web Developer
May 2019 — Jul 2023

Delivered websites, applications, and interactive digital solutions for clients across multiple industries, building a strong foundation in software development, design, and project management.

TOOLKIT

Unity | Unreal Engine 5 | C# | Blueprints | Spatial.io | XR / VR | 3D & 2D | Android & iOS | Google Play | Steam Publishing | Git | Performance & Optimization | Game Design | Rapid Prototyping | Player Engagement | Team Leadership

CLIENTS & COLLABORATIONS

Canvas Digital | Khareed-o-Mobile | LiftOnHai | ShotSpire

AWARD

FUTURE PLAY INVESTOR SUMMIT '26

AWARD · CEGA — RECOGNIZED FOR PIXEL DREAMS STUDIO

HOW I BUILD

01 Start with the Spark

What should this feel like to play? I sketch the core loop on paper before opening the engine.

02 Prototype Fast

A playable build in days. If it isn't fun with grey boxes, no amount of art will save it.

03 Design the Loop

Pacing, progression, tension and relief — the loop players can't stop playing.

04 Build It Right

Clean C# in Unity, Blueprints in Unreal. Component-based, readable, no surprises.

05 Test & Iterate

Builds in real players' hands early. Their first reaction beats a month of polish.

06 Ship It Smooth

Profiling, bug hunting, store assets, trailers — the last 10% that makes it a product.

CERTIFICATIONS

Unity Essentials Pathway

UNITY · CREDENTIAL

Real-time production in the Unity Editor — 3D scene navigation, Scenes, GameObjects, and Prefabs through to a published project.

Verify on Credly →

Unity Junior Programmer

UNITY · CREDENTIAL

Verified skill writing C# scripts inside the Unity Editor and building interactive experiences with Unity's tools.

SELECTED WORK

FEATURED TITLES — PIXEL DREAMS STUDIO & CLIENT PROJECTS

Chess Run ↗

LIVE · GOOGLE PLAY

PIXEL DREAMS STUDIO · UNITY · ROGUELIKE ENDLESS RUNNER

Arcade survival on an endless chessboard where every enemy piece threatens tiles exactly as it would in real chess. Slash pieces in a single stroke, chain combos, and transform into a Queen, Rook, Knight, or Bishop.

MY ROLE

Senior Developer — gameplay systems and the Google Play release build.

Worldscar

IN DEVELOPMENT

PIXEL DREAMS STUDIO · UNREAL ENGINE 5 · PC & CONSOLE

First-person horror escape room set in an abandoned bio-lab that rewrites itself as you move. Find the keycards, unlock the doors, and get out before the layout closes around you.

MY ROLE

Founder — from GDD planning to a functioning demo, all crafted solo.

Oneiros

DELIVERED · CLIENT

CLIENT PROJECT · XR · META QUEST

An XR eyewear showroom where every frame is a real object: pick one up, inspect it from any angle, pinch to scale, recolor to preview each finish, and snap it back with one action.

MY ROLE

Senior Developer — owned the interaction design and core XR systems.

Snatch ↗

COMING SOON · STEAM

RE-VISION · UNITY · COMPETITIVE ARCADE

Pong reinvented — speed, a wild arsenal of abilities, and cunning AI rivals. Quick, punchy matches in 1v1 duels or 1v3 chaos, built so one more round turns into ten.

MY ROLE

Senior Developer — gameplay and systems programming through to the Steam build.

ALSO SHIPPED

UNITY DEVELOPER · COBWEB GAMES · SIX TITLES LAUNCHED ON GOOGLE PLAY

Castle Invader ↗

Red Light, Green Light in a cartoon castle — move on green, freeze on red, one mistimed step ends the run.

Penguin Pinnacle ↗

A 2D platformer across four distinct worlds of obstacles, enemies, power-ups, and hidden secrets.

Swift Beat ↗

Rhythm platformer — guide a ball through hurdles in sync with the beat of each track.

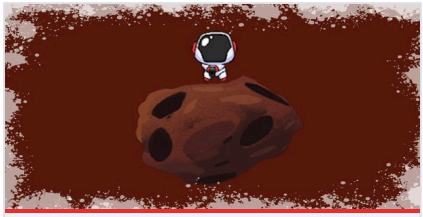

Slimey Adventure ↗

A Flappy-inspired endless runner that swaps pipes for enemies and power-ups.

Eggi Peggi ↗

Keep a fragile egg airborne by bouncing it off a determined chicken's head — endless, and score-chasing.

Meteor Chase ↗

An astronaut dodging meteors across a Tic-Tac-Toe arena, built around reflexes and quick thinking.

VENTURES

Pixel Dreams Studio

CO-FOUNDER · 2025–PRESENT · GAMES, XR & INTERACTIVE

Independent studio building premium games, XR applications, and interactive experiences in Unity and Unreal Engine.
